

U.S. Commercial Service Central America Infrastructure Directory

Costa Rica | Honduras | El Salvador | Guatemala | Nicaragua

INTERESTED IN INFRASTRUCTURE PROJECTS IN CENTRAL AMERICA? JOIN OUR REGIONAL INFRASTRUCTURE DIRECTORY

Costa Rica, El Salvador, Guatemala, Honduras and Nicaragua all have burgeoning infrastructure opportunities in airports, ports, bridges, hospitals, buildings and more.* We are currently tracking \$2.2 billion projects in various stages of development. If you are interested in pursuing opportunities in these sectors we invite you to join our Central America Infrastructure Directory. For \$450, your company will be featured in a two page profile (one English, one Spanish) that will be distributed to national and local governments, project developers, potential partners and more. We will directly send or personally deliver the directory to 20 contacts in each country and we'll share the contact list with you. We will also distribute the directories at regional construction/infrastructure trade shows and events. Over 200 project developers, government officials, potential partners and more in the five countries will benefit from this directory.

**If you would like a sample list of infrastructure projects and U.S. Commercial Service contacts in the region, please send an e-mail to Karla Tejada at karla.tejada@trade.gov*
